***Ex Parte Quayle***

This application is in condition for allowance except for the following formal matters:

***Specification***

The specification is objected to for failing to have the required sections as specified below in the guidelines provided.

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

**Arrangement of the Specification**

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
  - (1) Field of the Invention.
  - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

### ***Claim Objections***

Claim 1 is objected to because “the other” on line 5, “the longitudinal direction” on line 11, “the adjustment”, “the field”, and “the region” on line 13, lack antecedent basis.

Claim 1 is objected to because “preferably” (line 4) is indefinite. See MPEP 2173.05

Claim 2 is objected to because “characterized in that” is repeated.

Claim 8 is objected to for grammatical reasons; it appears that text is missing.

Claim 10 is objected to for grammatical reasons because on line 3, “the or” should be deleted.

### ***Drawings***

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, “ the lighting means and the reflectors (11,14) being offset from the center axis (18) and/or arranged at an angle to each other” as required by Claims 5 and 11, must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the

Art Unit: 2875

replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Allowable Subject Matter***

The following is a statement of reasons for the indication of allowable subject matter:

Regarding Claim 1, prior art does not teach or show a reflector arrangement comprising a first reflector and a second reflector (14) which is arranged inside the first reflector (11), two lighting means arranged one behind the other and with a focusing unit that is slidable axially in a longitudinal direction at the center axis (18) wherein the second reflector (14) is arranged in the region of the lighting means (13) on the focusing unit (22).

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Thomas discloses a reflector arrangement comprising a first and

second reflector wherein the inner reflector is longitudinally adjusted along the central axis.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
